PERSONAL PROJECTS

My Blog App (06/2022 - Present)

- This blog contains blog posts in various fields.
- Contact details and user information stored in MongoDB.
- Blogs are populated via internal self-made APIs made in Nextjs.
- **Tech Stack** used:- HTML, CSS, JAVASCRIPT, Next.js, MongoDB, Nodejs.
- **Deployed Link**:- <https://technoblog.vercel.app/>

My Notebook (05/2022 - 06/2022)

- A Notebook that stores all the notes in the cloud.
- Users have to **log in** to the app only to see their particular notes.
- This is purely **MERN Project**. No APIs are used for user login. **Self-made API** is used for user login and user authentication.
- Provided the best protection from the hacker. **bcryptjs** is implemented for password security.

NewsHunt (02/2022 - 03/2022)

- A news app that displays all the latest news daily in various categories.
- **News API** is used for displaying the latest news in the app.
- **Tech Stack**: HTML, CSS, Javascript, React.

Text editing app (11/2021 - 12/2021)

- This app transforms the text in many ways.
- It can remove extra spaces, convert to uppercase and lowercase letters, count no of words and sentences in our text, and many more.
- **Tech Stack**:- HTML, CSS, Javascript, Reactjs.
